

Summary:

- 3 years of experience of software development and requirements analysis including Mobile and Web development.
- Good experience in multiple Programming languages, Scripting Languages and Web Development Frameworks.
- Good programming skills in C, HTML5, Objective-C, Java, Angular JS, Java Script.

Significant Strengths:

- Very good team member, self-starter and a fast-learner. Ability to multi-task and adapt to different kinds of environments and teams.
- Strong conceptual, business, analytical skills and problem solving abilities.
- Recognized for dedication and ability to achieve results and thinking outside of the box.
- Good presentation and communication skills to provide support to customer as well as to communicate and collaborate with the team.

Technical Skills:

Programming Scripting & Languages: C, AJAX, HTML, Objective-C, Swift, JAVA, JSON, Java Script, HTML 5, CSS and SQL.

Frameworks, Runtime Environments and Development Tools: JQuery, Angular JS, Node JS, Dojo, ExtJS, React JS, Ionic, Xcode and Android Studio, Visual Studio.

Database Server: Realm, MySQL.

Version Control Tools: Git, Jira, Bit bucket, Source Tree.

Platforms: Android, iOS.

Systems: Linux(Ubuntu), Windows and Mac OS.

Education:

Post-Graduation Diploma in Internet Programming and Database Management

Lambton College, Toronto, Canada.

(Jan 2015 - Dec 2015)

Bachelor of Engineering in Electronics & Communications,

Jawaharlal Nehru Technological University, India.

(2009 - 2012)

Professional Experience:

Mobile Developer

Jan 2016 – April 2017

Screaming Power

- Developed modules as per project, defined Technical Specification and Functional Specification.

- Install, Setup, Support and Maintenance of Apache Cordova to use with Android and iOS development.
- Member of a team developing the Screaming Power mobile apps.
- The backend was developed in Realm and SQLite. The frontend was developed using HTML5, CSS, JS and JQuery.
- User Interface design using Cordova in both iOS and Android.
- Build and Configuration Management of development/testing environments running on Windows and MAC.
- Participating with senior developers on the mobile application design sessions.
- Participated in gathering and documenting Requirements and Specifications.
- Control of version and repository management with Bit Bucket and Git.
- Deployments to multiple servers in testing and production environments using Git.
- Coordinating with senior developers and deployment managers regarding the build deployments/releases.
- Coordinating with QA activates.

Angular JS Developer

Jan 2013 - Dec 2014

Swayam Infologic Solutions Pvt. Ltd, India

- Worked on multiple application development projects.
- Web development (frontend) using AngularJS, JQuery, Bootstrap, HTML5, CSS and JS. All these using Angular JS
- Design and Development (Web) of a monitoring application and to execute administrative tasks on the services.
- The backend was developed in MySQL and SQLite. The frontend was developed using HTML5, CSS, JS, JQuery.
- Installation and configuration different environments (Development, QA, Stage and Production). Planning, control and execution of technical and data environment setup for all the tests.
- Production support and technical support and Provide User support.
- Troubleshooting of incidents with client side.
- Develop bug fixes for front end angular JS coding.
- Ensured that all development and/or corrective software (version upgrades, software patches, or system interfaces, and installed devices, etc.) has been fully tested, documented and meet required compliance needs.

Personal Work:

Developed 2 personal apps in Xcode using Objective-c: **GeoFencing** and **SuperNote**
